STONY PLAIN, ALBERTA, THURSDAY, AUG. 12, 1926.

Whole Number 514

## There Are 22 Reasons "Why" Mr. Farmer Should Buy a New Frost & Wood Binder.

Among these reasons are: The platform frame is heavy angle steel, hot riveted together; cross shaft and pitman shaft are made of cold rolled steel; the platform apron guide is set extra low in frame; and the elevators have extra large capacity.

## Stony Plain's Second Annual Community Picnic Proves To Be a Great Success.

+++

On Wednesday afternoon last Stony Plain's second annual picnic was held, Edmonton Beach being the place for the celebration.

Early in the afternoon large crowds gathered in front of The Sun Office, waiting to be conveyed to the scene of the picnic.

These were accommodated in the large number of motor vehicles, the latter being crowded to their utmost capacity.

Owing to the busy season among the farmers at present, it was feared that so large a number of participants as last year would not be in attendance; but this proved to be erroneous, as an even larger

number than last year were on the grounds.

Once on the scene, the fun commenced, with some two score events on the program to be contested. These included baseball and basketball contests, wheelbarrow, swimming, etc. The result of the contests will be printed next week.

## LOCAL NEWS.

Mrs This Stringer of South Dakota, is visiting here with her parents, Mr and Mrs Ludwig Hasse.

Mr Gus Munro and family have gone to Gains farm near Sangudo.

Mrs M. Zucht was under the doctor's care this week.

Mr Lester, from Mundare, has received the appointment as manager of the new Brooks elevator in Stony. The elevator is expected to be open for business Sept. 1.

A very interesting series of pictures were shown Sunday evening in St Matthew school, in town, with an accompanying lecture by Mr Golz concerning schools being the social centers for the community. A goodly number were present, and appreciated both the lecture and the pictures.

Mission Festivals will be held Sunday next at the Blueberry church and Ingah church.

A farmer's frisky team made a wild dash for liberty up Main street Monday afternoon, bowling over pedestrians and, forcing auto owners to make desperate efforts to keep the bolters from ruining their cars. The team was captured near the Service Garage. The driver claimed some one had fed 'em wild oats at their mid-day meal.

Stony Plain Local U. F. A. held its regular monthly meeting Saturday night at the Royal Parlors, with W. M. Washburn, M. L. A., in the chair. Several communications were read by Secretary Zilliox, after which the matter of obtaining a supply of binder twine for the members was discussed. An offer from an outside firm to supply twine at \$15.85, was up for consideration. As a still lower offer of \$14.95 was introduced, the members seemed to favor this and the offer will be investigated, and probably accepted. A communication was received from the Central Office, asking that delegates be sent to the U. F. A. nominating convention for West Edmonton, to be held at Onaway tomorrow Aug. 13. Messrs P. W. Trautman and C. Propp were elected as the two delegates to represent this Local.

For the past few years the Armbruster planing mill has

## Get It at HARDWICK'S.

## Why Many Homes Are Damp Inside

Builders agree that the dryness of a building depends largely on the insulating power of its sheathing paper.

**Hercules** is the only building paper which offers 100 per cent. protection against winds and dampness. Its hard protective surface is obtained by using an exclusive coating preparation that is absolutely volatile.

The reduced heating expenses more than offset the slight extra cost of Hercules.

## There Isn't Time

Preparing for a brief holiday at a summer cottage on one of our lovely Western lakes, the writer of this column tossed a few old magazines in his grip wherever to pass an idle hour while lolling under the trees. Glancing through one of these his eye was caught by an article appearing under the heading which appears at the top of this column.

How often are people heard to exclaim, "I haven't time" or "There isn't time," uttered by way of excuse for not doing something which ought to be done. And how false and shallow such an excuse can be! The necessary time can always be found for the discharge of one's duties and obligations if the will to do is in evidence.

But on the other hand, it is perfectly true that "there isn't time" for many things upon which, nevertheless, countless people expend an enormous amount of very valuable time, resulting in prime waste.

Time is not a long, slow slide of movement when measured by centuries, and the history of nations, but is fast and short when gauged by the life of individuals. Men who have lived long and very active life are filled with noteworthy achievements have at the close of their careers experienced their regrets in words, "So much to do, so little done!"

Time, coupled with good health, is the most precious of gifts to mankind. Because the span of human life is brief, every moment should be put to the best possible use. Sufficient of it should be devoted to healthful pursuits and invigorating exercise and recreation in order that the body may be kept strong and physically fit to keep the mind alert and active and the body capable of the work it may be called upon to do. Only so can the best use be made of all the time allotted to the individual.

But, let it be repeated and emphasized, there isn't time in even the longest life for some things. Sorrows come at all times—some or other, but "there isn't time" to waste in brooding over one's sorrow and losses. To do so merely means to further shorten life.

There isn't time in this life for worry. Worry kills. It accomplishes nothing, but is wholly destructive and undermining. It is right, proper and altogether sensible and prudent to take thought of and for the future, but many people confuse this desirable trait with needless, senseless worry. "Life is too brief to hunt for grief, for thorns among the flowers."

How we may be today by what friends or others say about us. We may be misjudged, we are accused, and made to feel inferior. These things cut and sting, but "there isn't time" to let them continue. Along with them there are also many things to make us happy and glad. And we need all the time there is for the bright and joyous things of life.

Life is too short for thoughts of malice, hatred and revenge. Wrongs may be inflicted upon us, but by pursuing the even tenor of our ways, the mouth of the slanderer will be closed and his evil words effectively answered. "Life isn't long, just time for song, and love, and things sublime." Be not concerned with thoughts that burned. Good friends, there isn't time.

People there are who are so busy in this life getting everything out of it which seems to them all important and worthwhile that they can find no time to think of and prepare for a future life in which we all believe, while there are others so absorbed with thoughts of that future life that they become neglectful of the duties and responsibilities of this life and their obligations to others, and lead narrow, selfish lives in a continual atmosphere of gloom. Both are wrong. There isn't time for such misconceptions of the true meaning of life.

It would for most of us, be time well spent if once in a while in the quiet of an evening hour we made a mental inventory of our days, and weeks, and months, and carefully classified under appropriate headings the use being made of the time allotted to us. Are we using this precious inheritance, which once neglected is immediately gone never to return, for the improvement of our minds, an increase in our talents and powers, and devoting the best of which we are capable for the advancement of our age and race? If we are wasting precious hours and days on matters and things for which, after all, nobody really has any time to spare?

Several Chinese generals have issued edicts, imposing the death penalty on any soldier found smoking opium.

## England's Strongest Man

Blacksmith Bends Steels Bars and Easily Lifts Great Weight.

J. C. Emmett, of St. John, New Brunswick, is known as "the strong man of the west."

He bends a four-inch horseshoe nail double with his hands, and holding a bar of horseshoe steel in his teeth he takes one end in each hand and bends the bar into a loop.

Recently he lifted 430 pounds of iron from the ground to his knee.

Price has been a blacksmith for 30 years.

He is 43 years old. His height is 5 feet 10 inches and he weighs 224 pounds. He has a chest measurement of 50 inches.

**It Bids Pain Begone.**—When neuralgia racks the nerves or limbic cramps, it is well to turn to the virtues of Dr. Thomas' Electric Oil.

Well rubbed in will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A tame elephant eats more than one thousand pounds of green fodder and twenty-five pounds of unhusked rice daily.

## Take Over Elevators

Saskatchewan Wheat Pool the Greatest Wheat Handling Organization in the World

Elevators of the Saskatchewan Co-operative Elevator Company, Ltd., recently came under the management of Saskatchewan Wheat Pool, making the greatest wheat handling organization in the world.

The first payment of \$1,500,000 was made by the pool to the company by certified cheque. The pool previously had made a deposit of \$500,000 just prior to the meeting of the directors and shareholders of the company in April when decision to sell the company's elevators and holdings was reached.

The total amount to be paid for the elevator system of the Saskatchewan Co-operative Elevator Co. Ltd., by the Saskatchewan Pool Elevators, Ltd., is \$11,059,310.47 under the terms of the award handed down by a majority of the board of arbitrators.

## Armless Artist Wins Honors

Work of Japanese Girl Sold For Large Sum

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokio art critics by carrying off the honors of the Peacock's School exhibition. Holding specially constructed brushes between her teeth, Miss Yoneko Yamaguchi, the armless artist, had for several years painted oil, the decorative panels, especially by all Japanese women. Some of her work at the exhibit sold for as much as \$500. Miss Yamaguchi was to have been a geisha girl. After she had learned the samisen and graceful dances which pleases the Japanese tired business man, one night her father suddenly became insane, killed her five brothers and sisters and cut off her arms.

Time, coupled with good health, is the most precious of gifts to mankind. Because the span of human life is brief, every moment should be put to the best possible use. Sufficient of it should be devoted to healthful pursuits and invigorating exercise and recreation in order that the body may be kept strong and physically fit to keep the mind alert and active and the body capable of the work it may be called upon to do. Only so can the best use be made of all the time allotted to the individual.

But, let it be repeated and emphasized, there isn't time in even the longest life for some things. Sorrows come at all times—some or other, but "there isn't time" to waste in brooding over one's sorrow and losses. To do so merely means to further shorten life.

There isn't time in this life for worry. Worry kills. It accomplishes nothing, but is wholly destructive and undermining.

It is right, proper and altogether sensible and prudent to take thought of and for the future, but many people confuse this desirable trait with needless, senseless worry.

—  
Minard's Liniment for insect bites

For Scalds and Burns—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for many cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

## Observing Secrecy

Plan to Keep Anglo-American Liquor Agreement Secret

A controversy over publication of the new British-American rum agreement, just reached in London, is likely to develop in the United States if both governments persist in the present intention to keep the provisions secret.

Secretary of State Kellogg says that the agreement is neither a treaty nor a convention. If that construction is maintained the agreement would not have to go to the Senate for ratification and therefore the Senate would have no formal means of making the agreement public.

What Men Are Barred—Brighton is the only possessor of the first flat in all England built exclusively for women. The first block was dedicated by Lady Emmett. Each room is self-contained, and the occupant may have children or a woman companion—but no husbands, or anything of the kind. The rent averages about \$1.75 a week.

Minard's Liniment for insect bites

For Scalds and Burns—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for many cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

When neuralgia racks the nerves or limbic cramps, it is well to turn to the virtues of Dr. Thomas' Electric Oil.

Well rubbed in will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A tame elephant eats more than one thousand pounds of green fodder and twenty-five pounds of unhusked rice daily.

# The Vast And Varied Agricultural Possibilities Offered To The Settler In Canada

Canadian settlers are drawn from nearly every country in the world, and so vast and varied are the agricultural possibilities in Canada with respect to soils and climate that every settler should have little trouble in finding employment best suited to his particular taste or education.

The accompanying map will give some idea of the extent and distribution of Canada's fruit, ranching, dairying, wheat and mixed farming lands as they are to be found today.

The gardener can grow apples, peaches, plums, small-fruit in the Niagara district of Ontario, or apples and small-fruit in the Annapolis basin of Nova Scotia, and a variety of fruits in the Okanagan, Kootenay or New

market for domestic manufacturing, mining and other industries, in building up the volume and value of export trade, and in creating the purchasing power necessary to finance Canada's heavy imports of textiles, iron and steel, sugar, coal and other essentials which, for various reasons, are drawn wholly or largely from abroad. The statistics of yearly crop give but a faint picture of the manner in which wheat has impelled the material progress of Canada. When Western Canada fully captured the market of the last settler, when the last lands respectively fit for agriculture were definitely swept away, population and railways advanced more rapidly than they had ever be-

## Modern Ideas In Old Book Early Work on Kindness to Animals Is Being Reprinted

A treatise entitled "The Rights of Animals" was written by Henry Doggett in 1781 as a thesis in taking the master's degree at Providence College, now Brown University, has just been reprinted by the American Society for the Prevention of Cruelty to Animals.

It was printed at Sag Harbor, Long Island, in 1792, and is said to be the first American work on humanitarianism ever published. Copies are so rare that it has remained unknown except to a few collectors. As an ethical treatise, the work is considered of such excellence that it has been reprinted for free distribution, according to the introduction by Edward P. Buffet, in the hope that the sympathies aroused by it may not be limited to the readers' own pet animals, but may awaken humane efforts in another cause, the abolition of the steel trap.

# Dominion Land System Of Survey Has Proven To Be The Most Desirable In Every Way

## Record Gold Output

Gold and Platinum Produced in Canada in Increasing Quantities A record quantity of gold is being produced in Canada. Figures recently issued by the Canadian Government bureau of statistics show that in 1925 the output was 1,735,725 fine ounces worth \$25,880,826. This was an increase of 210,355 fine ounces over the 1924 production.

In 1925 Canada produced a total of 8,693 fine ounces of platinum worth \$1,025,182. Of other metals in the platinum group, palladium, rhodium, platinum, etc., the Dominion's output that year was 8,288 fine ounces worth \$18,589.

The bulk was mined in Ontario, which produced 1,461,039 fine ounces. British Columbia was second with 119,237 ounces. The Yukon produced 47,835 ounces; Manitoba, 4,424 ounces; and Nova Scotia and Quebec, 1,600 ounces apiece.

Of the platinum, 8,682 ounces was derived from Canadian ores treated in British and United States refineries. Practically all of this came from copper-nickel ores in the Sudbury district.

## Butter Awards At Regina

### Inter-Provincial Blue Ribbon Competition At Regina Exhibition

The Motherwell trophy representing the inter-provincial blue ribbon in creamery butter awards at the Regina exhibition was won by the Crescent Creamery Company, of Brandon, Man., after this company had scored first place in the Manitoba section for the provincial sweepstakes with Belmont Creamery in second place.

For the Motherwell trophy the Manitoba companies were in competition with Central Creamery, Calgary, who took the first prize, and Edmonton Pure Butter Company, second prize in the Alberta section, and in the Saskatchewan section, the Lloydminster branch of the Saskatchewan Co-operative Creameries was first and the Regina branch of the same company, second.

## Cat Walks 65 Miles to Old Home

A 65-mile trek meant little to Tommy, a pet cat owned by Mr. and Mrs. Robert F. Birkel, who moved from Danville to Lewiston, Pa., several weeks ago. A few days after the family moved the cat disappeared, and when Birkel was in Danville he found the cat had returned to the former home and was being cared for by neighbors awaiting his master's arrival.

Members of the pool stated at the close of the meeting that a fine feeling of co-operation had prevailed throughout the gathering and that they believed the success of the pool was assured.

Nowadays one hears of community settlements and the advantages of grouping settlers in such a way that they will get the most out of the amenities of modern civilization. By to carry the idea to its extreme so that the farms radiate from a central community has always brought forth objections on account of the difficulty of working land laid out in triangular shape or any other form departing from the square or rectangle. Even the rectangle is sometimes considered objectionable if the length greatly exceeds the breadth or the distance the farmer would have to travel to get to his work at the rear end of the farm would then be too great.

To trace the rectangular farm to its beginning carries us back to the days of the ancient Romans. It is recorded that the system, adopted by the Romans, by meridians and parallels was handed to the Romans by the Etruscans, the first people who really practiced agriculture in Italy. The division of land by these lines had a religious and mythical foundation. The unit of square measure was the "jugerum," which was approximately five-eighths of an English acre. In subdividing the lands of a colony, squares of 200 "jugera" were often used. Each of these was called a "centuria" and was 2,400 feet square, or a little more than three-quarters of the size of the quarter-section farm unit of Western Canada.

They were further divided into individual holdings, which ranged from two to four "jugera" or larger.

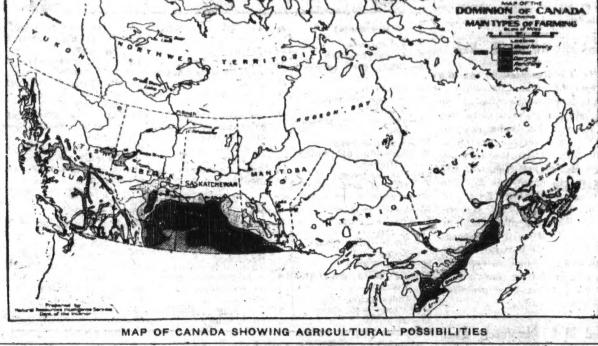

The rectangular system of survey based on meridians and parallels with sections one mile square, and six-mile square townships numbered in ranges, was first instituted in America in 1785 by act of the congress of the United States, providing for surveys of the public lands. The first surveys were in Ohio, where a principal meridian was established and at right angles thereto a base line from which the outlines of townships were projected. As the survey was extended, principal meridians and base lines were laid out in each state until at present there are over 30 meridians and almost as many base lines.

There has been a great deal of speculation as to who introduced this system of subdivision into America. One theory is that it was Colonel Bouquet, who in 1764 was acted by General Gage to report on a system of subdividing land for settlement in the vicinity of Fort Pitt. Thomas Hutchins, the surveyor who assisted General Bouquet, and was the first to actually apply the system when in 1755 he was delegated to stake out public lands in the state of Ohio. If Colonel Bouquet originated the rectangular system in America, then it may be said that the idea came directly from Italy; for although born in Switzerland, this officer served under the King of Sardinia in Italy before coming to this country.

No doubt one of the fundamental reasons for the adoption of the rectangular system in America was on account of the simplicity of the surveying and registration of land. Where townships are laid out from meridians and base lines a definite geographic position is allotted to each township whether it is surveyed today or in the future. The townships fit together with a few fractional parcels.

The rectangular system of survey by sections, townships and ranges, based on astronomical north-south and east-west lines was selected for the subdivision of Western Canada. This Dominion land system of survey has proved to be more economical for the purpose and is the most comprehensive uniform system of survey in the world. Under it about two hundred million acres of land have already been surveyed by the Geographical Survey. Approximately 15,000 townships have been scribed—the official documents accepted in all courts as adequate descriptions of land—Moose Jaw Times.

**Mussolini in Good Company**  
Jan Toorop, famous Dutch painter, is busy with a study of which the central figure is St. Paul. Toorop says his work will include the three figures who dominate the present time, St. Paul, St. Theresa and Mussolini.

MAP OF CANADA SHOWING AGRICULTURAL POSSIBILITIES

Westminster districts of the sunset province of British Columbia. The development of commercial nut trees is a recent and successful development in Southern Ontario and British Columbia.

In the foothills of Alberta, in some of the British Columbia valleys and in Southern Saskatchewan there can be obtained some of the finest ranching districts to be found in the world. While the Royal Highways the Prince of Wales, decided on ranching as a recreational hobby, it was in the Canadian western foothills that he made his choice.

The jolly shepherds too can feed their flocks in the central parts of Nova Scotia, and in the grazing districts of Southern Saskatchewan, and Southern and Southwestern Alberta, as well as in the central highlands of British Columbia. Nearly every variety of sheep can be, and is being, raised on the prairies in Saskatchewan and Alberta, from the Karakul (Persian lamb) sheep near Calgary through the Lincoln, Leicester, Cotswool, Shropshire, Oxford and Hampshire, to the finer woolled Dorset, Southdown and Merino. A small number of Scotch Black Fries, Suffolks and Cheviots are also found throughout Canada, but the numbers are not increasing very materially.

The strength of the dairy farm has been Southern Ontario and Southern Quebec and rightly so, as these districts are suited to intensive farming and are near large markets and also shipping ports, where butter and cheese can be disposed of at remunerative prices. The prairie provinces are also making rapid strides in the production of butter, and their progress during the past few years has been nothing short of phenomenal. At a dairy show held in London, England, recently, an Edmonton dairy won the first prize in the butter class, and the second prize went to the Shool Lake (Manitoba) Creamery. In the unsalted class a Regina creamery won the premier award.

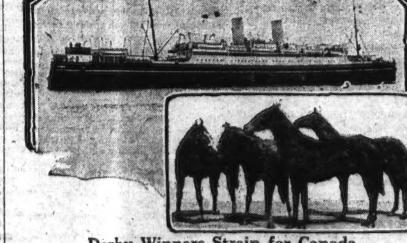

The fruit and dairy farms have, however, been vastly eclipsed by the tame of the western wheat fields. Perhaps no other natural product, whether of agricultural, forest, mineral or mining origin, has exerted so far-reaching an influence upon the economic life of Canada in recent years. Wheat has been the most powerful factor in attracting population and capital to the Dominion in bringing virgin areas under cultivation. In widening the

## Saskatchewan Seed Growers

J. F. Warren, Belbeck, Elected President At Annual Meeting

George Spence, former member for Maple Creek, and first president of the Saskatchewan Registered Seed Grain Growers Association retired from the latter when the seed growers held their annual meeting, W. J. Warren, Belbeck, Sask., past vice-president was elected president. M. P. Tally, Saskatchewan field crops commissioner, was re-elected secretary and general manager, and W. J. Warren, Belbeck, was elected treasurer.

Members of the pool stated at the close of the meeting that a fine feeling of co-operation had prevailed throughout the gathering and that they believed the success of the pool was assured.

Derby Winners Strain for Canada

Twenty-five thoroughbreds coming from all parts of Great Britain and Ireland were unloaded from the Canadian Pacific liner Metagama in Montreal recently for dispatch to the Mullans breeding and training ranch near Winnipeg, where they went by fast freight later. Several of them were finely bred animals, counting winners of the English Derby and Grand National in their strain.

Interviewed at the ranch, A. Mullans, owner and shipper of the horses, said he had brought 25 horses from England and Ireland, brought together at Dublin, and these sent to Southampton for shipment to Canada by the Metagama. They had, he said, come through the Voyage in British-Isles condition and after a few weeks' training, and racing would be "ready" in some cases to race. Mr. Mullans had been in the thoroughbred racing in

## KING DENOUNCES THE CAMPAIGN OF WHISPERING

Regina.—Denouncing what he termed the whispering campaign of slander against men in public life, and charging that if it was the best platform Mr. Melghen had to offer, the people of the Dominion should not elect Conservatives, Rt. Hon. Mackenzie King, Liberal leader, opened his Saskatchewan campaign in Regina when he addressed almost 4,000 persons in the Stadium.

Mr. King declared he was prepared to meet on any platform any man who, in the open, would make charges against any member of the administration, and said that the personal element implied by Conservatives was not a matter for parliamentary discussion, had no reference to customs matters and did not reflect against the government.

Referring to the advice given the Governor-General by Mr. Melghen, he termed it an act that Mussolini would not attempt, and violations of constitution that could not be found in 500 years of British history. He said the administration had been smuggled into office by a bunch of political smugglers and the prime minister through the door of Government House.

Mr. King urged that the people of the Dominion be not indifferent to such action, saying Mr. Melghen had put it over the two Houses of Parliament and the Governor-General and now trying to put it over the people.

The Robb budget was reviewed at considerable length, Mr. King saying "you have not to be told of the return of prosperity," and commented on the favorable trade balance of the Dominion, and the policy of wider world markets for agriculture as had been secured for manufactured products.

A sharp attack on Mr. Melghen's attitude toward the Canadian National Railway culminated when he charged that it was evident the railway was being used as a political pawn to secure support in the Maritime Provinces, and that he proposed to dictate the policy of the system on branch lines.

Returning to the constitution's question, Mr. King defended his advice to the Governor-General, and closed with an appeal for the preservation of the constitution.

### Another Gold Find In Ontario

#### Among Most Important In Recent Years Is Report

Toronto.—A spectacular discovery in the vicinity of Narrow Lake, some 30 to 35 miles northeast of Red Lake, in the district of Patricia, is reported by Jack Lindsay, who has just come out from that district showing samples of free gold, and which are stated to render the find among the most important discoveries made in recent years.

Mr. Lindsay is at present in Toronto.

The discovery was staked by Tom Bathurst, Ottawa.

The news of the discovery has been followed by a rush of men from Hudson and Red Lake during the last few days.

#### Given "Class War" Medal

London.—Men and women sent to prison for offences committed in defiance of emergency regulations imposed during the British general strike in May will be presented with a "class war" medal which has been struck for them by the International Class War Prisoners' Aid.

#### Bail Is Refused

Toronto.—With bonds as high as \$50,000 offered as bail for some of the sixteen under arrest in Ontario in connection with the deaths of alcoholics poisoning, the attorney-general's department is adamant in its refusal to allow bail to any of those concerned.

#### League Opens Deliberations

Geneva.—The committee of experts appointed by the League of Nations' Council to study the question of the education of young people in the aims and ideals of the League of Nations has opened its deliberations.

## Overseas League Gives Dinner To Willingdon

Canada's New Governor-General Asks Guests at Dinner

London.—Viscount Willingdon, who will succeed Lord Brack as Governor-General of Canada in the fall, and Lady Willingdon, were guests of honor at a dinner given by the Overseas League at the Hotel Cecil. The dinner was attended by 250 delegates, chiefly women of Canadian universities now visiting England.

The chairman, Sir Campbell Stuart, Canadian-born director of The Times Publishing Company, assured Lord Willingdon his Canadian days would never be dull and that he would return to England at the end of his term, like all his predecessors, a good Canadian. Sir Campbell told the Canadian women present they were fortunate in their Governor-General's wife. The women of Canada, he said, offered Lord and Lady Willingdon a true Canadian welcome to their Canadian home.

Viscount Willingdon thanked the Canadian visitors for their kindly greetings and said he hoped they would return to Canada firmly convinced that the Mother Country was very much alive and a worthy mother of her great daughters growing to be great nations.

## Postpone Conference On Child Welfare

#### Date Scheduled Came In Week Of Federal Election

Ottawa.—The sixth annual Canadian conference on child welfare, which was scheduled for Vancouver, B.C., September 13, 14, 15 and 16, has been postponed on decision of the executive members and the British Columbia committee on arrangements.

It was not desired to hold the sessions during the week of the federal elections, and efforts to convene the conference the following week had to be abandoned when it was found impossible to transfer some of the most important speakers, including Sir Henry Gavin, of London, England, to a later date.

The conference has therefore been indefinitely postponed, but the council secretary, Miss Charlotte Whitton of Ottawa, will leave for the west early in October to arrange for the holding of the sessions on a later date.

The annual meeting of the child welfare council will be held in Ottawa during October.

## Urges Closer Empire Unity

#### Premier of Australia Opposes International Independence of Dominions

Melbourne, Australia.—Speaking during the debate on the imperial conference agenda in the House of Representatives, Premier Stanley Bruce urged the need of greater imperial co-operation and sympathetic understanding of the aspirations of young nations.

He declared the adoption of international independence by the dominions would mean disintegration of the empire and added: "Australia will have no part in that."

Australia must aim, the premier said, at the closer linking up of the self-governing portions of the empire with an full a recognition of the independent status of each as is compatible with recognition of universal British nationality."

#### Delegates Pass Through Canada

London.—British delegates to the meeting of the Empire Parliamentary Association in Australia sailed on the Empress of Scotland on August 7, and therefore passed through Canada. For the first time since the gatherings have been instituted four delegates of the Irish Free State are included.

#### First Carload Of Wheat

Winnipeg.—The first carload of wheat from the 1936 crop was loaded by the Canadian Pacific Railway Company at Rosenfeld, Manitoba. The wheat is a typical Manitoba first-class product and will be moved to Winnipeg for the Ogilvie Milling Company.

#### Quebec Candidates

Quebec.—Candidates in the federal election held at the present time in the province of Quebec are as follows: Liberals, 62; Conservatives, 8; Independents, 1.

## SITUATION IN MEXICO WATCHED WITH INTEREST

Mexico City.—The movement among Roman Catholics to exert the pressure of an economic boycott against the attitude of the Mexican Government in enforcement of the new religious regulations is being watched with keen interest in Mexico.

Business circles are plainly worried over the consequence of an economic boycott or even a slowing down in purchases by the public under the plans of the League for the Defence of National Liberty. Although there have been no serious outward evidences of an economic boycott in Mexico City, reports from elsewhere, in the republic state that the volume of business has been tangibly reduced in some places.

Meanwhile both the government, with its supporters in its present stand in religious laws, and the Roman Catholic Episcopate, as well as Catholic leaders, are both standing firm in their respective positions. The government's adherents maintain that President Calles is only enforcing the laws of the country, which the Catholic authorities have openly announced they intend to "disobey."

#### Thinks India Should Have Gold Standard

#### But Royal Commission Would Not Put Gold In Circulation

London.—The royal commission appointed last year to examine Indian currency and exchange has issued a report advocating a true gold standard by linking the existing currency with gold in a conspicuously visible manner, but without putting gold into circulation. It is claimed by the commission that its proposals open the door for the introduction of gold currency some time in the future, but it foresees that when the time comes India may no longer wish for a gold currency.

#### Gives Ovation In Rome

Rome.—General Umberto Nobile, captain of the Amundsen-Ellsworth dirigible Norge on her flight over the North Pole, arrived in Rome from Naples, receiving a great ovation by the populace and warm praise by Premier Mussolini.

#### Wanderers And Also Of The English Team Say Good-bye

The seven weeks' tour of the English football team, who played 20 games across Canada and back, was brought to a successful conclusion when they boarded the Canadian Pacific liner Montreal bound for their homeland.

The players all expressed their thanks for the hearty reception accorded them wherever they went and have left Canada greatly impressed, not only by the people, but by the country itself for its scenic beauty. Banff and Lake Louise were two of the most beautiful spots in Canada, they declared, while Vancouver was just like Windsor, where they scored 13 goals, making a grand-total of 118 goals for Canada within the next few years.

Wanderers and also of the English team said: "The object of the tour has been fully accomplished.

It has proved that there is a big public for soccer in Canada and a fine career is ahead of the game in this country." Association football in the Dominion of Canada within the next few years is fair to become a rival to the brand of football played by the major leagues in Great Britain, he added.

The total goals scored by the English team was 105 with only 18 regulation games against them, not including the exhibition games played at Ottawa and Windsor, where they scored 13 goals, making a grand-total of 118 goals for Canada within the next few years.

Joe Smith, captain of the Bolton

## Meighen Denounces Liberals

#### Says Mr. King Trying To Hide the Web of Wickedness

North Bay, Ont.—Standing at the portal of the great north—as he himself put it—Premier Meighen declared his readiness to co-operate with the Ontario Government in a practical plan to "get something done" in the development of Northern Ontario water power.

Mr. Meighen had a trenchant phrase for the accomplishments of the King administration. Liberals were waving flags and shouting hallelujahs "over reducing taxes, while the sales tax was two-thirds higher than when they took office. They want to get your blessing," he said, "for raising taxes on the masses of the people and reducing them on the rich."

He described Mr. Mackenzie King as struggling "desperately for some issue other than the customs report." "There's no effort he won't make," Mr. Meighen exclaimed, "to hide the web of wickedness."

## Honored At Welsh Ceremony

#### Duke and Duchess of York Members Of Gorsedd Order of Bards

Swansea.—A throng of 15,000 witnessed a notable ceremonial at the Yeath National Eisteddfod, in which the Duke and Duchess of York were initiated into the Gorsedd Order of Bards. The Duke, in his graceful manner, expressed gratitude for the privilege.

The Duke and Duchess, wearing white silk robes, entered at a trumpet blast. At first being welcomed, they were favored with the flowing head-dress of the order.

The Duchess also spoke briefly in English, and then added the Welsh equivalent for "Thank you very much."

#### To Contest North York

Newmarket, Ont.—Harry Sifton, of Toronto, son of Sir Clifford Sifton, was chosen by North York Liberals to contest the riding at the coming federal elections. Col. A. E. Kirkpatrick and Captain Aubrey Davis were also nominated, but withdrew. North York is the constituency in which former Premier W. L. Mackenzie King was defeated by Col. Herbert Lennox in the 1926 general election.

#### Secession League

Perth, Australia.—A Secession League has been formed here to assist the movement for the secession of Western Australia from the Commonwealth.

## TWO RAILWAYS ARE ACQUIRED BY ALBERTA GOVT

Edmonton, Dunvegan and B.C. and the Central Canada Railways now rests with the Alberta Government, which will proceed to deal with other interests for their future operation or as an alternative will operate them as a public enterprise. The ownership rights have been secured in consideration of \$1,275,000, which has been paid over to the Royal Bank in final settlement of its claim of \$2,400,000 and accrued interest. Complete control of both railway lines thus passes to the province.

A further step in clearing up the Northern Railway situation has been taken. It is announced by the government, by giving notice to the Canadian Pacific Railway of the government's intention to terminate the existing agreement under which the C.P.R. is operating the freight and passenger services on both lines. This has been done in a letter from Premier Brownlee to President E. W. Beatty, which was the subject of discussion between the Premier and D. C. Coleman, vice-president of the C.P.R., a few days ago.

Premier Brownlee also has declined the last offer of the C.P.R., which proposed a renewal of the agreement on somewhat different terms. No new offer has yet been received, and it is not known if the government offices whether or not another will come from the C.P.R.

## Source Of Poison Alcohol

#### Death Dealing Deception Shipped From New York Warehouse

Buffalo, N.Y.—Federal agents located a warehouse on the west side, in New York city, from which was shipped the poison alcohol which caused the death of nearly 50 persons in Western New York and Ontario. This information was contained in a telegram received from Frank J. Hale, federal supervisor of alcohol control, from William E. Dunn, Jr., and Joseph Spizzo, members of his squad.

Col. S. C. Miller was informed that one man, a German citizen, had been arrested as an alleged member of the ring of distributors of poison liquor which shipped 4,400 gallons to this city. The alcohol is believed to have been imported from Germany. The deaths resulted when the ordinary methods of rectifying denatured alcohol failed to succeed with the German alcohol.

## Russia Has Keen Competition

#### Will Have Some Trouble Exporting Grain This Year

Moscow.—Despite the prospect of an excellent harvest, says S. G. Bronevman, managing director of Russia's biggest state grain export corporation, the country will experience great difficulty in exporting grain this year because of the rivalry with the United States which, he adds, is already exporting its surplus.

Besides this, he continues, Rumania and Bulgaria had very good crops, a large part of which would be exported. Moreover, Poland, owing to lack of foreign currency, would be compelled to export rye in large quantities at low prices, thus competing with Russia.

Importing countries like Italy and France, he explained, would be obliged because of their financial positions to restrict their purchases sharply.

#### To Use No Force

Mexico City.—The Archbishops of Mexico City and the Roman Catholic Church will never approve of armed uprising, but the church will "go to Calvary" if necessary, in the present religious struggle in Mexico. Mgr. Pascual Diaz, bishop of Tabasco and secretary of the National Episcopate, told the Associated Press.

#### Would Deport Miss Gibson

Rome.—Alienists who have examined the Hon. Violet Gibson, who attempted to make up with the Royal Canadian Mounted Police, have recommended that she be placed in an asylum. They may seek that she be handed over to the British authorities for deportation.

## Bass of the North Country

The moods and fighting qualities of the bass of the North country are fully explained in this article, written by Ozark Ripley, the well-known authority on angling:

Somehow or other, I am never impressed with the ubiquity of bass until I travel into the north parts. Mr. Micropterus, better known as the small mouth bass, often a red-eye, seems to thrive, somehow, wherever you plant him. I have him in the Laurentides, even in Maniwaki, also along that rail route which runs from Montreal to Mont Laurier in Quebec. This makes me think that, irrespective of the cold waters, this fighting chap will thrive anywhere you give him a chance.

I think for this that the range of the small mouth, as far as the north country was concerned, was limited to Lake Penage, the Kawarthas Lakes and others in Ontario, and that he is especially at home in the north. I found him in the Laurentides, even in Maniwaki, also along that rail route which runs from Montreal to Mont Laurier in Quebec. This makes me think that, irrespective of the cold waters, this fighting chap will thrive anywhere you give him a chance.

There are parts of the north country where one will be puzzled a bit to find the bass, unless he strives to bring a rise in a proper manner, as in a river, or a stream, or a creek, or a brook, rainbow or brown trout, but the offering has to be made to their liking or not at all. If bass in the north country like one thing better than all else it is a floating fly. They

love them; they attack them whatever the shape or color. But they have moods like other game fish, and many days no instance of even kind can be found. Even if they have a long day, and have fished northern bass waters without immediate results, there is no reason why you should be disappointed. They will do business when they are in the mood, and at no other time.

I remember I once fished near Pine Rapids Camp in the French River District. For four days I did not get a single rise, though I felt they were most profiting bass waters. I had to go to the lake and fish there during the previous season. All the time there had been a driving wind from the northeast. Suddenly it changed to a mild west one on the afternoon of the fifth day. At once the bass began to rise and took to their beds. As far as I can find, such numbers have not been taken since. They had found my lures and the weather to their liking, and continued their striking for many days.

I make no long journey to the north country for bass and other game fish. It invariably pays to be provided with an assortment of lures. There are days when they will look at nothing but the underwater lures; then on what we may call a bass bait day, they will take nothing as fast, will come hours when only floating flies or casting baits will tempt them. The man who tries continually and is equipped with everything right, usually is the one who comes home with the record-breakers.

## Here and There

"There is no chance of another general strike in Great Britain for a generation and perhaps longer," is the view of Victor Subr, news editor of the Evening News, London, who spent a short vacation in Canada recently. He thought the miners' strike in Great Britain would not be settled before the fall and perhaps not until the winter.

The fishing season opens again August 15 on Lesser Slave Lake and Lake La Biche in Alberta. There are approximately 100,000 pounds of white fish to be shipped during the season from Lake La Biche and over half a million pounds from Lesser Slave Lake as well as a considerable quantity of jackfish and pickerel from both.

Canada's estimated wheat yield as indicated by crop conditions on June 30 is 348,626,000 bushels. The yield estimated for the Prairie Provinces according to the Bureau of Statistics report is 822,226,000 bushels and for the rest of the Dominion 21,400,000 bushels. Total estimated yield for Canada is 452,240,000 bushels and for barley, 100,624,000 bushels. For rye the total estimated yield is 11,762,000 bushels and for flaxseed 8,419,000 bushels.

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province which when completed will provide the incoming settler with all available information on such lands. A total of 2,474 homesteads have been taken up in Western Canada this year. All post-war immigration records were broken recently when Winnipeg recently in 48 hours.

The Earl of Clarendon, British Under-Secretary for Dominion affairs, and T. Macnaul, chairman of the Canadian delegation, are making a tour of Canada to investigate conditions under which the 5,000-family scheme is being handled in this country. They are issuing glowing reports of what they have seen. The full three thousand families will have been brought over here by the end of next year.

A civic-vacation party arranged by the Kiwanis Club of Shenandoah, Iowa, recently passed through Toronto and Montreal en route to London, England. There were 600 who availed themselves of the trip and most of them had never travelled outside the United States before in their lives. They will pass through Stratford-on-Avon and Oxford on their way to London and will make a side-trip to Paris and the French battlefields during their stay.

"Association football in the Dominion of Canada had within the next few years to become a rival to the brand of soccer played by the amateur leagues in Great Britain," was the comment of Joe Smith, captain of the All-England Association Football team which has just completed its seven-week tour of Canada. The team travelled close on ten thousand miles on its tour and played twenty games against all kinds of teams. They did not lose a single game and scored 105 goals in all, with only 12 registered against them.

University men, municipal and government representatives, doctors, priests, notaries, lawyers and newspapermen made up the majority of the party of 160 people who took part in the across-Canada tour of the Université de Montréal recently completed. They were feted and welcomed by c.v.n., university and government heads throughout their tour and from it with a far clearer notion of the problems of the West than when they started. The tour was run on C.P.R. lines under the auspices of the University of蒙特利尔, and was the second annual tour, a hat has been made.

Skims Cleaner, Lasts Longer than any other Cream Separator

**SQUARE CUT GEARS LAST LONGER**

than usual gears on any machine—you know that. That is just one reason why the Meloette gives you many more years of service. The average life is a son.

**MELOETTE** ORIGINAL  
Cream Separator

in twenty years, and during that period you separate 14,000 milkings. You may easily be wasting from 20 to 30 cents on each milkings. The Meloette cream separator is saving along to the calves and pigs in the skin-milk. Figure out what you are saving.

A REBATE will save it all and we own the first year. We will make a generous allowance and it will give you a new cream separator and will save it in one year from the time it will save.

Write for illustrated catalogues.

Thousands of Churches are without ministers notwithstanding the great need of preaching the Gospel

There is a Doctor in the Lord—for healing the Word of God—comes free

The people need the Word as never before. Will you do your part? The International Bible Society Association will supply Ministers of the Gospel free of charge on application. Conditions: Open the church buildings, admit all free, take no collections. ADDRESS: G. A. Ware, 5 Gondell Block, Edmonton or IBSA, 270 Dundas St. W., Toronto, Ont.

## Stony Plain and District.

On Wednesday August 4, to the wife of Andrew Kotscherosky, a daughter.

On Aug. 6, at Glory Hills, to the wife of Mr A. Carter, a son.

Miss Evelyn McCabe, Edmonton, is visiting this week with Miss Anna Moyer.

Mrs D. W. Pattie returned Friday to her home at Rocky Mountain House.

Col. Jamieson, the Conservative candidate for West Edmonton, was in Stony Plain, meeting friends.

Herman Löeblich, the well known ball player, was on Monday night's train, going west, to keep an engagement at Seattle.

Mission Festival services were held on Sunday last at St Peter's Lutheran Church, Edmonton, which drew a goodly crowd of worshippers from this district.

The dance at Sand Hills School House, Friday night was well attended.

While a crowd of town sports were returning home about 1 a.m. Monday morning, and coming along the Garden Valley road east of Geo. Duololke's farm, their car jumped the trail, took a "nose" dive and a couple of rolls. All of the occupants made their exit thru the top, except the one who had been knocked unconscious.

Hon Chas Stewart was present on Saturday at the nominating convention of Dr Gershaw, at Medicine Hat. The Liberal candidate is expected to pay Stony a visit in the near future.

Stampeded by the tumbling cattle market, farmers are rushing unfinished stock into Edmonton so rapidly that the local market is flooded, causing very little trading, and sending the weakening prices still lower. Edmonton dealers are asking cattle raisers to hold their cattle until the rush is over and say the prices are bound to rise. Cattle are better in the fields and can command a better price.

Mr George Broadbent, the well known rancher of Gramma, was the host on Sunday afternoon to a large motor party of ladies and gents from Edmonton.

### Farmers Name D M Kennedy.

Expressing his desire to go to Ottawa with no strings attached to him except those of the U.F.A. directorate, D. M. Kennedy, former member for the district was again nominated as U.F.A. candidate at the convention at Spirit River held last week. Although opposition has been expected Mr Kennedy received an unanimous convention.

Indications are that three-cornered fights will be avoided by the Liberals in Alberta wherever possible, but in those ridings where the former members elected as Progressives turned on the low tariff forces the fights will be three-cornered. Vegreville and Peace River already have nominated Liberals, otherwise the Liberals probably will be found contesting only those seats they already hold.

## Spruce Grove News

The ball game billed here for Sunday afternoon last did not take place owing to the unsuitable weather.

Mr Dickie is engaged in putting a roof on the Jasper Highway Amusement Hall and Tea Room.

At Spruce Grove, Thursday August 5, to the wife of Joe D. Miller, a daughter.

Mr D F Macalister, former manager of the Gillespie elevator here, was visiting this week with friends at the Grove.

Veal porterhouse steak was on the marble slab at Mr McKeen's meat emporium this week. This was but one of the many choice cuts of meat always to be found at this first-class butcher shop. Mr McKeen is noted as an A1 judge of good animals when he sees them, and this accounts for the goodly assortment of choice cuts which he has on display and the goodly number of satisfied customers which come in to purchase.

A Mission Festival will be held on Sunday next at Peace Lutheran Church.

Mr Dickie's dance Thursday night last, drew a 1st-class crowd, Martin's Orchestra being the musical attraction.

An auto accident occurred Thursday night near town, when a car driven by a local farmer ran into one which had become stalled on the road. The ramming car suffered some injury, and the standing car had its front fenders broke in.

Mr Philip Unterschuetz, a pioneer farmer of the Spruce Grove district, passed away

in one of the Edmonton hospitals on Friday August 6th, at the age of 76 years. He is survived by his wife and five children: Mrs W. S. Willies of Lacombe; Mrs Jacob Boos, Mrs P. H. Goebel, and John of Spruce Grove, and Philip Unterschuetz of Edmonton.

A private service was held at the family residence on Monday afternoon, and a public service at the St. Matthew's Church, Spruce Grove. Rev G. Poetzsch officiated, and paid a tribute to the departed. Interment took place in the graveyard near the church.

The Winterburn vs Grove ball game result: Grove won, 12 to 5.

## 1926 AUTOMOBILE ROAD MAP HERE.

All Main, Secondary and Intermediate Trails Plainly Shown

The 1926 edition of the Automobile Road Map of Alberta, described by James W. Davidson, president of the Alberta Roads Association, as the most authentic and accurate, yet made, is just off the press. It is published by the Western Canada Road Route Service Ltd., of Calgary.

A copy of map has been received by the Stony Plain Sun and a personal of it shows the great care and infinite work that was necessary in its preparation.

It is announced that the map will be on sale in most of the stationery stores and garages in Alberta or may be secured direct from the publishers.

This big map sells for 75c. It is valuable to anyone starting out on a motor trip as it will be a stimulus to tourist traffic in the province.

## Duffield Notes

Another dance was held Saturday night at the new barn on the Hy. Lutz ranch.

Bills are out for tenders to be called to carry the mail between Duffield, Mewassin, Highvale and Burtonville.

The new building for the Mr Smith's sance factory is nearing completion.

Some good work has been done on the road from town to the Jasper Highway.
